- *Python (framework Django),*
- *PHP,*
- *HTML5, CSS3,*
- *C++.*

Experienced with:
- *GIT,*
- *Unix Console,*
- *IDE Netbeans, Aptana,*
- *MS VisualStudio,*
- *MS SQL SERVER,*
- *3D Studio Max,*

DBMS:
- *MSSQL,*
- *MySQL.*

Foreign languages:
- *English – advanced,*
- *Russian – native.*

ADDITIONAL INFORMATION

I always try to be passionate to what I'm doing. Now I am a PhD Student at the University of Trento (Italy), where I do a research in a computer science with the focus on the crowdsourcing. A scientific research for me is a way to improve myself significantly, reach high goals in academic career and leave an impact in current branches of computer science.

I consider myself as a potential entrepreneur. I have already owned a private enterprise, related to astronomy. Last year I have participated a lot in different events, focused on startup creation. I have a goal, after my PhD, to create an innovative interdisciplinary company, oriented on improving the quality of life of people like you and me.
